

ABDUL HADI AAMIR

PRE-SALES ENGINEER

OVERVIEW

The trustworthy project hand you can rely on. I exhibit extreme passion for working with diverse tech projects that place you on the arena for excellence not only in front of your clients but with internal teams as well. My motives lie in the picture where both the shareholders and resources unite to produce something like never before. And hence contribute to the success of the project altogether

UI/UX Design Specialization
(CalArts)

Enterprise Design Thinking Badge
(IBM)

Intro to Software Product Management
(U of Alberta)

WORK EXPERIENCE

NETSOL Technologies Inc. (Pre-Sales Engineer)

December 2019 - Present

Worked as a junior Developer in the Business Improvement Group initially, then got promoted as a Pre-Sales Engineer to Business Analyst Group (BAG)

Projects:

HRIS Portal for UK

Got the opportunity to develop dashboard functions for the Human Resource Information System which was for our UK client. Developed Real-time graphs, Organograms and Salary Upload/View interfaces in the portal

Online Attendance Update Feature (HRIS)

Developed online interface for attendance marking for the HRIS portal. The system took date and time values as input to send on to company reports later generated by system and displayed the number of working hours too. We could also view attendance histories and make edits which were then approved by team leads and PMs

Confirmation Process

A module I made that confirms probationary employees within the company as part of the HRIS portal. It contains 4 phases, and is initiated by HRBP. and then passed on through HODs, and upper management and after final approval, the user gets marked as permanent and is entitled to leaves and benefits according to configurations.

Point of Sale

Worked on NETSOL's flagship product of asset finance and leasing which we provide to vehicle vendors for end to end management of the leasing process. Gave online demos for some of its features through screen sharing platforms

Contract Management System (CMS)

Worked similarly on this portal which was the sister product of our Point of Sale (POS) that we provide to Finance Companies for their end-to-end leasing processes. Got to develop. Apart from that, was responsible to design proof of concepts for above and provide tech support to clients on and off.

INTERNSHIPS

Toyota Motors

SySTEMS AND NETWORKING

ZONG 4G

ADMINISTRATION
